PROFILE

I am a junior software developer with a background in consulting. I am a true people person and love working with teams and/or clients. I have always been curious about learning things, such as human languages and technology and I enjoy finding creative solutions to problems, which is why I decided to transition into software engineering. I particularly love seeing my work turn into a practical product and I can't wait to start my new journey as a software developer.

SKILLS

- React
- Node.js/Express
- MongoDB
- PostgreSQL
- HTML5
- CSS3
- Vanilla JavaScript
- jQuery
